Introducing the **XSB2IP4MP28-AI+**, an advanced security camera engineered to deliver reliable and high-quality surveillance for a wide range of environments. Providing real-time video output at a maximum resolution of 2688×1520 at 30fps, it ensures clear and detailed monitoring for everyday security needs. Powered by AI-ISP technology, the camera delivers an excellent noise reduction effect, improving image clarity even in challenging conditions. With intelligent analytics, it enhances monitoring capabilities for smarter and more efficient surveillance. Designed for versatile lighting conditions, the camera supports warm light and infrared dual supplementary lighting, allowing effective monitoring both day and night. It also supports backlight compensation, strong light suppression, 3D digital noise reduction, and a 120dB wide dynamic range, making it suitable for different video environments while maintaining balanced and clear images. For enhanced interaction and monitoring, the device is equipped with 1 built-in microphone and 1 built-in speaker, enabling audio functionality. Built for durability, it is designed to meet IP67 dust and water resistance standards, ensuring reliable performance in both indoor and outdoor installations.
