WIFI CAMERA

Quick Installation Guide

GSDGROUPINC.COM

Thank you for using OV Connect. Please setup your camera by following the steps below:

1. Before installing the camera, please determine the installation location(flat surface or wall) and ensure that the wifi camera is adequately powered. It requires 12V1A DC power.

When the camera is installed in a place where it is difficult to obtain a Wi-Fi signal, please use a Wi-Fi extender to extend the Wi-Fi network range.

2.Connect power adapter to the camera. Please keep the wires away from children to avoid any potential danger. In order to get the best image quality, please don't touch the camera lens with your hands. Please make sure to use the matching power adapter cable, or the camera may not work properly

Once the camera is ready and in pairing mode, you will see the red light flashing slowly, and it will say: "Please configure network settings with the app."

1.App Installation

1. Download the APP

- Download the "OV Connect" app from the App Store(IOS devices) or Google Play (Android devices).

01

Scan the QR code below to download the APP
