

PTZ CAMERA

Quick Installation Guide

1. Installation

Step 1: Stick the mounting template to the wall, drill 4 expansion screw holes.

Step 2: Hammer the 4 expansion screws into the drilled wall holes.

01

Step 3: Align the 4 expansion screws with the holes of the bracket, install the gasket and the spring washer, then lock the 4 nuts.

Step 4: Fasten the anti-dropping rope of the locked dome camera into the suspending rope loop of the bracket.

02

Step 5: After the tail cable of the dome camera passes through the bracket, align the notch of the adapter cover with the rivet position of the bracket and insert it into the bracket hole.

Step 6: After rotating the dome camera to the proper position, tighten the 2 socket head cap screws M6*16 on the bracket.

2. Camera Connection Diagram

▲ Attention: There are two connection modes:
1. For non-PoE router, pls connect the camera by a PoE switch or a PoE injector.
2. For a PoE NVR, pls connect the camera directly to the PoE NVR, then follow the below steps.

05

3.Install the APP

There are two methods to install the App.

- Searchfor "OVConnect" in the App store or Google play

- Scan the QR code below to download the App.

When you choose Manual Add, input the correct camera information and then click Save.

4.Camera Settings

Once you open the "OVConnect" app, you will see the following interface to add your device

Click +

Add your device by scanning the QR code or click Online Device to add it manually

If the device is successfully added, when exiting the device list, you will see the following:

Please refer to the Personal Center for more detailed instructions.

Scan the QR code above for instructions on the Smart Guardian app

5.In Windows

1. On our website www.gsdgroupinc.com, click "Learning & Support" > "Software" to download "Discovery Tool", it will help to search all the available G.S.D.devices on your local network.

2. In the "Discovery Tool", you can modify the information of a selected device including its IP, Media Port, Web Port, Gateway, Net Mask, etc. (The default username & password is: admin & admin123.)

3. Open a web browser and input the device's IP address; Input the username & password in the following interface to login the device.

4. After login, click "Remote Setting" to change the settings.

5.In Mac OS

1. Open Device Search on your router web interface and login.
2. Find the "Attached device" or "Connected device" menu. Find the device's IP address according to it's MAC address. The Mac address is labeled on the device.

Picture for reference only

3. Input the device's IP address in Safari, login with your username & password.
4. After login, click "Remote Setting" to modify the setting.
